DETAILED ACTION

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered new claims 27-47 have been renumbered 32-52.

2. Applicant's amendment filed April 30, 2002 in Paper No. 12 is acknowledged. New Claims 27-47 are renumbered to be Claims 32-52 as stated above. Claims 1-52 are pending.

Election/Restrictions

3. Regrouping of the pending claims has been necessitated by the amendment of April 30, 2002 and added new claims. The restriction requirement of record is modified as set forth below

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-7, drawn to a method for screening for bioactivity of a candidate compound toward a group of related target proteins, classified in class 424, subclass 9.1.

II. Claims 8-10, drawn to a method for screening for bioactivity of a candidate compound toward a group of related target enzymes, classified in class 424, subclass 94.1.

Art Unit: 1641

- III. Claims 11-16; *19-26; 41; 47-52; (part of each) 38-40, 42-46*, drawn to a method for determining the presence of active target members of a group of related proteins, classified in class 435, subclass 7.8.
 - IV. Claims 17; *(part of each) 32-40, 42-46*, drawn to a method for determining in a plurality of proteomic mixtures the presence of active target members of a group of related proteins, classified in class 436, subclass 161.
 - V. Claim 27, drawn to a system for identifying active target proteins, classified in class 702, subclass 19.
 - VI. Claims 28-31, drawn to a system for determining the status of a biological system, classified in class 702, subclass 81.
 - VII. Claims *18; (part of each) 32-40, 42-46*, drawn to a method for determining in a plurality of proteomic mixtures the presence of active target members, classified in class 435, subclass 4.
5. The reasons for restriction are of record in the office action of December 19, 2001.
6. Previously Claim 18 was grouped with Claim 17. It is now separated from Claim 17 because it has been amended such that the method steps of Claim 18 are different from those of Claim 17.

Art Unit: 1641

7. In view of the fact that claim 19 has been amended to effectively be a subset of Claim 11 (i.e. “enzymes” are a subset of “proteins”), Claim 19 has been included with the invention of Claim 11 (Group III).

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
